

AMM: axis-wise interaction

Shared expansion per branch: $D \rightarrow S \times D$

One vector from each axis

View axis

$Z[m, :, d]$

View MLP

$6 \rightarrow 12 \rightarrow 6$

Modality axis

$Z[:, s, d]$

Linear

$3 \rightarrow 3$

Feature axis

$Z[m, s, :]$

Feature MLP

$256 \rightarrow 1536 \rightarrow 256$

Mappings are shared across the other positions.

Block 1: $S \rightarrow M \rightarrow D$

Block 2: $M \rightarrow S \rightarrow D$

Mean over $S \rightarrow 3 \times D$
